| 19 February 2018   | Balázs Hangya  
                     Koki, HU                      | Tonic and phasic properties of central cholinergic neurons in sensory detection   |
| 26 February 2018   | Claudia Bagni  
                     Uni Lausanne, CH               | TBA                                                                             |
| 5 March 2018       | TBA                           |                                                                                 |
| 12 March 2018      | Randall Platt  
                     ETH Zurich, CH                  | In vivo gene editing and genetic screening with CRISPR-Cas systems             |
| 19 March 2018      | Robert Hindges  
                     Kings College London, UK        | The roles of synaptic adhesion molecules to shape functional visual circuits    |
| 26 March 2018      | Wolfgang Maass  
                     TU Graz, AT                    | Searching for principles of brain computation                                   |
| 2 April 2018       | EASTER MONDAY                          |                                                                                 |
| 9 April 2018       | Arthur Liesz  
                     TU Munich, DE                   | Immunological mechanisms in stroke                                              |
| 16 April 2018      | SECHSELÄUTEN                          |                                                                                 |
| 23 April 2018      | Asya Rolls  
                     Israel Institute of Technology, IL  | Using the brain to control immunity and fight cancer: implications for placebo response  |
| 30 April 2018      | Eran Perlson  
                     University of Tel Aviv, IL      | ALS as a spatiotemporal mis-localization disease                                |
| 7 May 2018         | Urs Meyer  
                     UZH, CH                        | Study of gene-environment interactions in brain development                      |
| 14 May 2018        | Laura Cancedda  
                     IIT Genova, IT                  | Microglial Defects and Cognitive Impairment in a Mouse Model of Down Syndrome   |
| 21 May 2018        | WHITE MONDAY                           |                                                                                 |
| 28 May 2018        | Rosa Cossart  
                     INMED, FR                      | Shaping the functional structure of the hippocampus                              |
