

Monday Seminar

Lecture hall 35F32, 12:30pm

FS2012

20 February 2012 Host: O Raineteau	Nora Abrous (Inserm Bordeaux, F)	Role of adult-born neurons in memory
27 February 2012 Host: U Gerber	Kasper Vogt (Biozentrum Basel, CH)	Imaging inhibition in the hippocampus
05 March 2012 Host: I Mansuy	Thérèse Jay (Inserm Paris, F)	Contribution of maladaptive prefrontal network plasticity to psychiatric disorders
12 March 2012 Host: F Helmchen	Erin Schuman (MPI Brain Research, Frankfurt, D)	Dendritic Transcriptomes and Proteomes
19 March 2012 Host: U Gerber	Laurent Venance (Collège de France, Paris, F)	Encoding learning and memory: the many faces of spike-timing dependent plasticity
26 March 2012 Host: F Helmchen	Reto Huber (University Children Hospital, Zurich, CH)	Sleep and synaptic homeostasis
02 April 2012 Host: F Helmchen	Daniel Huber (Geneva, CH)	Plasticity and stability in motor cortex during learning
Tue 10 April 2012 Host: A Mosberger	M. Pessiglione (ICM, Paris, F)	What makes us stronger: looking for motivation in the human brain
16 April 2012 Host: F Vajda	Rüdiger Klein (Max Planck Institute, Munich, D)	Eph/Ephrin signaling and the development of locomotor circuits in the mouse
23 April 2012 Host: M Schwab	Yves-Alain Barde (Biocenter Basel, CH)	New insights in neural development from engineered embryonic stem cells
Wed 2 May 2012 Host: M Schwab	Jan Pielage (Friedrich Miescher Institute, Basel, CH)	Molecular mechanisms controlling synapse formation, organization and maintenance
07 May 2012 Host: I Mansuy	Marian Joels (University Medical Center Utrecht, NL)	The timing of stress: from patch clamping to human behavior
14 May 2012 Host: O Raineteau	François Guillemot (NIMR, London, UK)	Transcriptional control of neural stem cell fates in the mouse brain
21 May 2012 Host: I Mansuy	Elisabeth Binder (Max Planck Institute, Munich, D)	Molecular mechanisms of gene x environment interactions: focus on early trauma and mood and anxiety disorders
