

Monday Seminar
Lecture hall 35F32, 12:30pm

FS 2015

Date	Speaker	Title of seminar
16 February 2015 Host: Helmchen F	Hannah Monyer DKFZ, Heidelberg	Underlying circuits supporting spatial navigation and odor processing in the entorhinal cortex
23 February 2015 Host: Helmchen F	Oscar Marin King's College, London	Molecular regulation of cortical interneuron diversity and plasticity
02 March 2015 Host: Schwab ME	Olivier Pertz University of Basel	Visualizing spatio-temporal signaling programs regulating neuronal cell morphogenesis
09 March 2015 Host: Jessberger S	Cedric Blanpain, Université Libre de Bruxelles (ULB) Brussels	Stem cells and tumor heterogeneity
16 March 2015 Host: Jessberger S	Fiona Doetsch Biozentrum Basel	Stem cells in the Adult Brain: Glial Identity and Niches
23 March 2015 Host: Gerber U	Anthony Holtmaat University of Geneva	Mechanisms for LTP in the mouse barrel cortex
30 March 2015 Host: Mansuy I	Marian Joëls UMC Utrecht Brain Center Rudolf Magnus, Utrecht	The brain mineralocorticoid receptor in health and disease
13 April 2015 Host:	Sechseläuten	
20 April 2015 Host: Schwab ME	Georg Keller FMI Basel	Predictive sensory processing – a basis for a canonical computation in cortex?
27 April 2015 Host: Jessberger S	Sophie Jarriault IGBMC, France	Probing the nuts and bolts of natural transdifferentiation
4 May 2015 Host: Helmchen F	Andreas Frick INSERM, Bordeaux	Neocortical defects in the Fmr1-/- mouse model of intellectual disability and autism spectrum disorders
11 May 2015 Host: Mansuy I	Antonella Riccio Laboratory of Molecular Cell Biology, UCL, London	Identification of a novel class of activity-regulated enhancers in cortical neurons
18 May 2015 Host: Schwab ME	Antoine Adamantidis Universitätsspital Bern	Optogenetic dissection of sleep-wake circuits in the hypothalamus
25 May 2015	Pfingstmontag	
1 June 2015 Host: Mansuy I	Gerhard Schratt University of Marburg	Novel mechanisms to regulate local miRNA function in dendrites
